

CENTIPEDEGRASS LAWN CALENDAR

Mowing Height:

1” – 2” raise ½” higher in hot weather. This is an important practice for a healthy centipedegrass lawn.

Water:

1” per week if no rainfall. 30 days watering allowed for newly planted sod or seed. Sod laid in fall or winter months should be kept moist.

Fertilization: 1 – 2 lbs N/1000 ft²/Yr

Follow fertilizer recommendations on soil test report. If the soil was not tested, use any turf fertilizer and follow label rates.

In the spring, do not apply nitrogen containing fertilizers until the soil temperature at the 4” depth is constantly 65° F and rising.

Ideal pH Range: 5.0 – 6.0

Lime is rarely needed.

Aeration:

Use a core aerator during active growth season.

Dethatch: If thatch exceeds 1/2”, use a vertical mower with blades 1” apart; go over the lawn in only one direction. Topdressing with ¼” of soil can be effective.

Seeding – New Lawn*:

0.25 – 1.0 lb per 1,000ft².

Overseeding – Established Lawns*:

Overseeding centipedegrass with ryegrass is not recommended.

Sodding:

500 ft² per pallet typical.

Weed Control:

Read product label carefully to determine which weeds are controlled and on which grasses the product can be used.

Spring preemergence* prevents crabgrass, goosegrass, and other annual weeds.

Broadleaf postemergence* spot spray to control broadleaf plants like chickweed, wild violet, dandelion, wild onion, etc.

Grassy weed postemergence* control grassy weeds like crabgrass, dallisgrass, etc. Do not apply to drought-stressed turf.

Winter preemergence* prevents chickweed and other winter weeds.
